

Question for your doctor about your FoundationOne results

Which genomic alterations were found in my tumor?

What are the targeted therapies that might benefit me?

How will my physician use the results of my test?

If there is more than one possible therapy, which one should I pursue and why?

What are the benefits of the targeted therapy? What are the side effects?

What clinical trials are open to me based on the genomic alterations in my tumor?

Where are they located and how do I find out more about them?
